ABOUT HARI OM BIOWARE

About Hari Om Bioware

Hari Om Bioware brand was launched in 2019 with the primary aim to deliver sustainability to everyday disposable products. For 4 years we have been supplying to some of the largest conglomerates of the world through our job works. We have come to believe that our customers need better products and better services. It is in our DNA to put customers first and with largest manufacturing facility in the country with largest product SKUs we stand tall and proud in bringing the best and finest to you. Be it your regular tableware needs or your customized packaging need, you will come to believe that we are the best of both worlds. From Israel to US and from Australia to Middle East we have our presence everywhere through our channel partners. **Hari Om Bioware** products are made from sugarcane fiber residue called 'bagasse'. Our product range includes simple yet elegant plates, bowls, trays and cutlery – at affordable prices. At we truly believe that our natural products will change the way you eat, serve and package food.

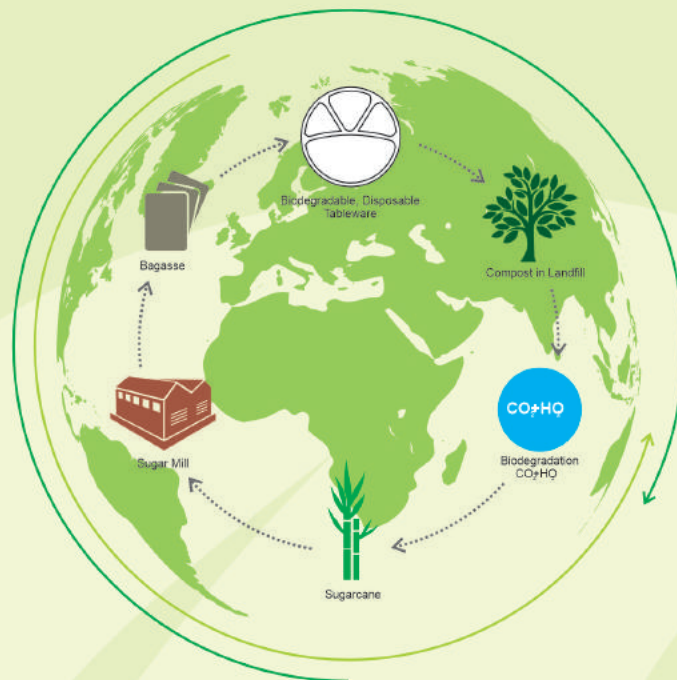

Our Vision

Making earth a better place to live by reducing the use of single-use plastics, which has caused untold damage to the environment and adversely impact human health. Our approach to packaging has always been centred around good design and in our efforts to make sustainable packaging more user-friendly we are undergoing research & development continuously at our head office to provide the best possible innovations in the market.

Our Mission

Hari Om Bioware is a brand that promotes and sells eco-friendly products. We work to influence people and society at large to choose green alternatives. We believe that any business has Social, Economic and Environmental responsibilities. With a dream to make sustainability affordable and to change the mindset that being eco-friendly is a lot of work, we are working hard to bring green products that can replace many things in our lives.

PRODUCT CYCLE

At **Hari Om Bioware**, we feel a very special love for the trees and everything green.

We envision a future where mankind lives in harmony with nature and detaches from its now-strong bond with concrete and screens. We envision a future where our children can still, just like us, visit the jungle on occasion and enjoy swimming in clean rivers and oceans.

Did you know that every piece of plastic that was ever made is still on Earth and has not even started biodegrading? As vast landfills fill with oceans of endless, used plastic, the environment-friendly in us looks to make a difference.

Hari Om Bioware was founded in 2019 in order to create biodegradable and compostable, high quality tableware. As our primary and only raw material is bagasse, a waste product of the sugarcane industry, we leave the minimum possible carbon footprint on our beloved planet.

All of our single-use packaging, crockery, and container products are manufactured in our state-of-the-art manufacturing facility in Rajkot, Gujarat, and are made from agro-wastes.

Just like nature goes through the endless and beautiful process of birth, death, and rebirth, as seen in the food chain, in the history of the human population, and in the life cycles of the great jungles, our industry takes part in a self-sustaining and renewing cycle.

Our disposable tableware is born of bagasse, a waste-product of the sugarcane industry. When composted, it enriches the fertility of the soil. This can pave the way for the next generation of sugarcane to grow.

Product with Principles.

Hari Om Bioware tableware is completely free of intermixing with the food – preserving its original test & flavour.

It is also completely water and oil resistant.

At **Hari Om Bioware** our actions are aligned with our mission of making the planet a healthier place, **Hari Om Bioware** tableware is free of carcinogens, chlorine, and BPA, PFAS.

Our products are made from renewable resources, which are plastic-free and 100% compostable, and biodegradable, which keeps harmful chemicals in the ground and plastic pollution out of landfills.

We are committed for being responsible and to promote caring for mother earth, spreading as well as enhancing the awareness about the environment around us to make it a zero waste planet.
